

SECOND INTERNATIONAL SUMMER SCHOOL

Preface

This communication would like to offer an initial content map of the Second International Summer School in Reggio Emilia and in Ligoncho, that would like to be an occasion for encounters, dialogue, study among people from different cultures and from different experiences.

We also would like to have an opportunity to create an occasion where we study together by having an active role in the development of the programme.

The Preschools and Infant Toddler Centres, Istituzione - Municipality of Reggio Emilia, Italy are world wide recognized as high quality educational experiences.

The town of Reggio Emilia has always invested in early childhood services since the beginning of this pedagogical experience after the second world war.

Within this experience, a pedagogical and cultural project has been developed that has continued to represent a point of reference of intense vitality, research and innovation, not only for the town of Reggio Emilia, but also at national and international level.

The aspect of Reserch for Innovation that characterizes the pedagogical experience of Reggio Emilia has been appreciated in the world and its study in depth has encountered the interest of many teachers, pedagogistas, atelieristas, educators, researchers and administrators in the Educational field.

A Second Summer School in Reggio Emilia and in Ligonchio would like to offer opportunities to continue to study in depth the experience of the Municipal infant-toddler centres and preschools, its ongoing evolution, through different modalities of professional development occasions.

The place that has been chosen as a support to the context of Reggio Emilia for the theory and practice is Ligonchio, a small village located in the high Appennino Reggiano, with its specific natural and environmental characteristics.

A bibliography of texts and articles will be given in advance to the participants before coming to Reggio Emilia. The texts should be read and studied in order to further develop thoughts, reflections and questions that then in Reggio Emilia, will find a place capable to be listened to and valued.

The main contents of the Summer School are not part of a list of topics in a sequence, but rather they are part of a map of contents that is not divided into categories but it is more an interwoven map of learning opportunities.
